A lot of things can catch us off guard. Diabetic eye disease doesn't have to.

What is diabetic eye disease?

It is a complication of diabetes that has no warning signs and can lead to vision loss or blindness if left untreated.

What should you do?

If you have diabetes, get a comprehensive dilated eye exam at least once a year. Ninety-five percent of severe vision loss from diabetes can be prevented with early detection, timely treatment, and appropriate follow-up care.
